

## CYNDI YAG-HOWARD MD, FAAD

ADVANCED DERMATOLOGY  
AND SKIN SURGERY SPECIALISTS, PA

### Accomplishing One Goal & Looking Ahead at Another

In November 2011, Dr. Yag-Howard accomplished a personal goal by completing the NYC Marathon and raising more than \$5,000 for Camp Discovery, a camp for children with devastating skin diseases. While her own children, who hope to work at the camp when they are older, made bracelets to support the cause, her husband, Corey Howard, MD, an Ironman triathlete who practices lifestyle medicine, cheered for her along the entire route.

In the coming year, Dr. Yag-Howard, along with her family and friends, will be working on another goal—to start a program that will allow collection and redistribution of used sporting goods equipment so that children with limited means will be able to participate in sports. The potential benefits are many. “Our hope is that the program will encourage exercise, healthy lifestyles and a sense of belonging and purpose. Ideally, children will also be discouraged from making poor choices that can coincide with boredom and low self-esteem,” she says. They intend to call the program Two Time Champions.

Recognized nationally as a speaker on surgical techniques and cosmetically elegant surgical outcomes, Dr. Yag-Howard recently had two articles about surgical techniques she created accepted by the prestigious international journal, *Dermatologic Surgery*. In March, she will be presenting her work at the national meeting of the American Academy of Dermatology (AAD). Dr. Yag-Howard also recently received the esteemed Presidential Citation Award from the AAD for her many leadership roles in the AAD and American Medical Association.

Dr. Yag-Howard’s practice specializes in surgical and general dermatology, healthy skin care and rejuvenation, as well as facial sculpting using Restylane®, Perlane® and Dysport®. She and her staff are confident that you will feel cared for in a beautiful and friendly environment by professionals who truly care about you and your health.
